## CASE STUDY FOR WIRELESS INTERNET ACCESS

### The Solution

The firm turned to GNCI's products and services. GNCI has a proven track record in delivering solutions for certified, secure financial/data transactions with Fortune 1000 Companies. This extensive experience of specialized network design/engineering combined with GNCI's Program Support Services such as site survey, staging, and installation programs matched the firm's requirements perfectly.

Sample network topology for GNCI's MSM (Multiple-Service-Modem/Router) for secure internet access:

### The Result

The accounting firm has successfully deployed GNCI's MSM Wireless Internet Access application as the primary internet communication program for their field audit teams.

GNCI was able to respond to this firm's needs with network design expertise and client specific software that delivered a quick and easy wireless alternative for on-site internet access. This program provides the customer the certainty that their field audit teams can operate and communicate confidential data between the client site and their HQ data center with ease. GNCI delivers secure, turn-key wireless programs at a reduced cost and eliminates the inconvenience of leased lines/satellite.

### Benefits

- Significant cost savings versus leased landline
- Improved time-to-market with speedy deployments
- Versatile and flexible applications
- High security features / IPSEC / VPN client-server
- Easily upgradeable radio card PCMCIA / Cardbus slot for future broadband platforms

- High-Speed Wireless Communications
- Highly Secure Networking Devices
- Versatile, Flexible Applications
- Cost Effective
