

GNCI

THE MSM FROM GNCI

Fast, Flexible, and Secure

Wireless Networks are bigger and faster than ever before. The GNCI Multi-Service Modem combined with CDMA technology provides the necessary speed to deploy business applications that normally are deployed on 56KBPS Frame Relay or Private Lines. Chose from 1xRTT EVDO, or REV A service, all available now.

- **Last Mile Connectivity**
- **Wireless Backup**
- **Temporary Locations**
- **Emergency Circuit Relocation**
- **Mobile Office, Branch, Store**
- **Internet Access**

GNCI

UNLEASH THE POWER OF WIRELESS THE GNCI MULTI-SERVICE MODEM

Standards based Networking and Security

Industry standard IPsec with 3DES encryption is used for security over the internet and radio networks. Built in firewall features ensure unauthorized access attempts are logged, and denied.

Network Management

Graphical User Interface (GUI) simplifies configuration and management. Comprehensive error reporting via SNMP, plus local and remote syslog capability ensure easy integration into existing management platforms.

Wireless Service From GNCI

GNCI sets the standard for complete turn key network deployments. Get the job done right with programs from GNCI.

Site Surveys

Your success rate for wireless deployments greatly improves with GNCI's site survey program. Our trained technicians are dispatched on short notice to most locations in the USA to provide a comprehensive site analysis, giving our customers concise site and RF information.

Inventory and Staging

Have your equipment shipped straight to the site, already configured and ready to operate. With the purchase price of an MSM, GNCI provides a no cost staging service, whereby GNCI will configure and test units to be deployed, prior to shipping anywhere in the USA.

GNCI

- **High Speed Wireless Communications**
- **High Security Networking Devices**
- **Versatile, Flexible Applications**
- **Cost Effective**
- **Rapid Deployment**
