

## NEWS RELEASE

### Global Net Commerce, Inc. Announces Novatel Wireless PC770 2-in-1 PCMCIA ExpressCard Modem Support

#### *Providing New Wireless Program Services to the Financial Industry*

**Irvine, California – December 17, 2009** – Global Net Commerce, Inc. (GNCI) announced today the release of driver support for the Novatel Wireless PC770 2-in-1 PCMCIA ExpressCard Modem, an external CDMA-based radio module. This is the latest radio module to be supported by the MSM wireless router/modem. The PC770 features a combined ExpressCard and PCMCIA functionality. The MSM requires the PC770 PCMCIA adapter to be used for proper connectivity.

The PC770 uses the latest Qualcomm CDMA chipset to support EVDO Rev.A, delivering typical throughput of 600 to 1,400 kbps downlink speed and 500 to 800 kbps uplink speed.

“GNCI is proud to offer support for this advanced mobile networking product in our MSM router/modem,” said Michael Goraleski, President and CEO. “The PC770 allows our new and existing customers to benefit from the convenience and speed of EVDO Rev.A in their networking applications and the freedom to incorporate ExpressCard/34 modems into the MSM router without the costly expense of purchasing a new router with an embedded modem.

Joseph Chan, Vice President, further adds: “We have tested this radio module extensively and we are very pleased by its performance and reliability. By extending radio card support to external ExpressCard attached modules, GNCI’s MSM wireless router/modem continues to be the industry leader in the number of radio modules supported.”

GNCI’s applications use standards-based networking and security. Industry-standard IPSec with 3DES or AES encryption is used for security over the internet and radio networks. Built-in firewall features ensure unauthorized access attempts are logged and denied.

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing, engineering/development of wireless applications, and offers installation, maintenance and servicing of wireless 3-G / Broadband / Next Generation products for the ATMs and telemetry of high profile financial institutions and affiliated member networks.
