Global Net Commerce, Inc. launches enhanced Evaluation Program

Providing New Wireless Program Services to the Financial Industry

Irvine, California – January 21st, 2007 – Global Net Commerce, Inc. (GNCI) is launching a newly enhanced customer evaluation program. Effective immediately, GNCI will begin allowing “qualified” clients access to GNCI’s Multi-Service-Modem/router (MSM) hardware solution. According to Mike Goraleski, President and CEO, “This new program allows customers up to sixty (60) days to test-drive/evaluate the MSM router solution at “no cost”. “Additionally, GNCI will provide up to four (4) hours of senior level engineering design and network support. The program helps the client jump-start their testing and evaluation process. “Security and technical design requirements need to be identified in the early stages of launching a wireless program”, said Colin Chester GNCI’s CTO. “Our customers want the flexibility to evaluate/certify the MSM application and then move quickly into a larger pilot or full-scale deployment. –this is a win-win scenario for both GNCI and our customers.”

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing engineering/development of wireless applications, offering installation, maintenance and servicing of wireless 3-G/Broadband/Next Generation products for high profile financial institutions’ ATM’s, Telemetry and affiliated member network ATM’s. Our professional services and skilled technicians are focused on delivering reliable and quality support for wireless ATM programs. The executive management of GNCI possesses over 100 years of combined experience in the ATM and financial services industries. GNCI is privately owned and operated and is based in Irvine, California.
