

NEWS RELEASE

Global Net Commerce, Inc. announces Remote Monitoring Programs

Providing New Wireless Program Services to the Financial Industry

Irvine, California – July 10th, 2006 – Global Net Commerce, Inc. (GNCI) is pleased to announce expansion of its program services to include mobile ATM wireless monitoring. GNCI today announced that it will begin offering remote monitoring programs for client mobile ATM fleets. Customers are looking for simple and secure solutions to assist them with handling the monitoring of wireless communication networks. This back-office function offers up to 7/24 remote site/wireless mobile trouble-shooting support for clients with small to medium wireless fleets. According to Mike Goraleski, President and CEO, "This new program allows customers to have the convenience and cost-efficiencies of deploying fixed and mobile wireless fleets and eliminates the staffing and internal learning curve associated with troubleshooting wireless networks."

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing engineering/development of wireless applications, offering installation, maintenance and servicing of wireless 3-G/Broadband/Next Generation products for high profile financial institutions' ATM's, Telemetry and affiliated member network ATM's. Our professional services and skilled technicians are focused on delivering reliable and quality support for wireless ATM programs. The executive management of GNCI possesses over 100 years of combined experience in the ATM and financial services industries. GNCI is privately owned and operated and is based in Irvine, California.
