Global Net Commerce, Inc. Introduces MRM L-3000

Providing New Wireless Program Services to the Financial Industry

Irvine, California – November 10th, 2010 – Global Net Commerce, Inc. (GNCI) announced today the expansion of its new MRM series hardware platform. This router is uniquely suited for clients seeking a level 3 router application that supports legacy protocols. “The MRM L-3000 supports Bisynchronous and SDLC and allows clients the knowledge base/expertise to continue to run legacy ATMs, said Wolfgang Tolkien, Product Development Manager. The MRM L-3000 application supports IPSec and multiple routing protocols. This level 3 router meets a specialized market that allows clients to service/manage ATMs without having to convert their legacy ATMs to TCP/IP.” The product is a great fit for EFT processors. The user interface expedites setup/configuration and supports client/user specific firmware.”

“GNCI’s roll-out of the MRM L-3000 is significant, said Mike Goraleski, President and CEO. GNCI’s legacy protocol engineering and firmware development knowledge for SDLC/Bisynchronous networks is difficult to replicate in today’s environment. The MRM L-3000 is built for maximum durability and has extensive software enhancements. The application has upgraded monitoring/SNMP trap and diagnostic capabilities. GNCI’s MRM-L3000 supports all major carrier ExpressCard and USB 3G modems, as well as interface with future 4G/LTE modems. This new platform complements the existing line of GNCI gateways and modems.”

GNCI’s applications use standards-based networking and security. Industry standard IPSec with 3DES or AES encryption is used for security over the Internet and radio network. Built-in firewall features ensure unauthorized access attempts are logged and denied.

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing engineering/development of wireless applications, offering installation, maintenance and servicing of wireless 3G/ 4G Broadband/Next Generation products for high profile financial institutions’ ATMs, telemetry and affiliated member network ATMs. Our professional services and skilled technicians are focused on delivering reliable and quality support for wireless ATM and branch back-up programs. The executive management of GNCI possesses over 100 years of combined experience in the ATM and financial services industries. GNCI is privately owned and operated and is based in Irvine, California.
