

## NEWS RELEASE

### Global Net Commerce, Inc. Introduces MRM X-3000

#### *Providing New Wireless Program Services to the Financial Industry*

**Irvine, California – June 17<sup>th</sup>, 2010** – Global Net Commerce, Inc. (GNCI) announced the addition of a new hardware platform designed specifically as a Level 3 router application. “We are pleased to introduce this new platform to our product line said Joseph Chan, Vice President. The MRM-X3000 application will support IPSec and multiple routing protocols. As a level 3 router it is easy to integrate with existing client networks.” The product is perfect for large ATM fleets. The user interface expedites setup/configuration and supports client/user specific firmware.”

“GNCI is very positive about this wireless solution, said Mike Goraleski, President and CEO. The MRM-X3000 is designed for maximum reliability and has many hardware and software features normally available on much higher-end platforms. The application also provides new monitoring and diagnostic capabilities. GNCI's MRM-X3000 supports all major carrier ExpressCard and USB 3G modems, as well as interface with future 4G/LTE modems. This new platform is a great addition to the existing line of GNCI gateways and modems.”

GNCI's applications use standards-based networking and security. Industry standard IPSec with 3DES or AES encryption is used for security over the Internet and radio network. Built-in firewall features ensure unauthorized access attempts are logged and denied.

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing engineering/development of wireless applications, offering installation, maintenance and servicing of wireless 3G/ 4G Broadband/Next Generation products for high profile financial institutions' ATMs, telemetry and affiliated member network ATMs. Our professional services and skilled technicians are focused on delivering reliable and quality support for wireless ATM and branch back-up programs.
