Global Net Commerce, Inc. Now Supporting Sierra Wireless 4G/LTE For Verizon

Providing New Wireless Program Services to the Retail and Financial Industries

Irvine, California – February 3rd, 2012 – Global Net Commerce, Inc. (GNCI) today announced the expansion of its support for the Sierra Wireless Raven GX440 product line. This marks the next evolution of Sierra Wireless 4G/LTE wireless gateways available on Verizon's 4G network. This embedded gateway supports IPsec and is well suited for clients seeking a 4G gateway device with exceptional management features. "The Raven GX440 is compatible with Cisco-based platforms," said Mark Meierhoefer, GNCI's Product Operations Manager. "The product offers specialized carrier interface capabilities which simplifies management of our clients' CDMA/4G wireless activations and firmware/PRL updates. The product is a great fit for customers looking to use wireless for both primary and back-up connectivity."

"GNCI has been supporting Sierra Wireless products for many years," said Mike Goraleski, President and CEO. "GNCI has both engineering and firmware development knowledge that dates back to its purchase of the Airpac Router from Sierra Wireless in 2002. The Raven GX440 is built for maximum durability and has dual antenna capabilities. The application has a robust monitoring/SNMP trap capability. The Raven GX440 LTE/4G is also available with GPS and GPS/WIFI. This new platform is a great add-on the existing line of GNCI gateways and modems."

GNCI's applications use standards-based networking and security. Industry standard IPsec with 3DES or AES encryption is used for security over the internet and radio network. Built-in firewall features ensure unauthorized access attempts and logged are denied.

Global Net Commerce, Inc. (GNCI) is a leading provider wireless application for the financial services and retail verticals. GNCI provides manufacturing engineering/development of wireless applications, offering installation, maintenance and servicing of wireless 3G/ 4G Broadband/Next Generation products for high profile financial institutions' ATMs, telemetry and affiliated member network ATMs. Our professional services and skilled technicians are focused on delivering reliable and quality support for wireless ATM and branch back-up programs. The executive management of GNCI possesses over 100 years of combined experience in the ATM and financial services industries. GNCI is privately owned and operated and is based in Irvine, California.
